

# MTA Exploratory Data Analysis

Emily Hillenbrand

Katrina Bykova

Xinxin Jiang

# Introduction

## Motivation

- Maximize “WomenTechWomenYes” gala attendance

## Goal

- Optimize street team placement at subways

## Objective

- Find busiest NYC subway stations

# Methodology

## Data

- NYC subway station traffic for March through May 2019
- Collected at individual turnstiles

## Assumptions

- Historical entrance/exit data can be used to predict future station use
- Surveys to be completed by June
- Three months ahead is sufficient time to build awareness

# Results

Few stations have high traffic volume

# Results

## Top 3 busiest stations:

# Results

- Most traffic: Monday thru Friday
- Consistent for top 3 stations

# Recommendation

## Street team placement plan:

### Where:

- 34<sup>th</sup> St - Penn Station
- Grand Central Terminal
- 34<sup>th</sup> St - Herald Square Station

### When:

- Mon-Fri

# Future Work

- Nearby universities or tech companies
- Busiest entrances
- Time of day
- Data collection period
